Part II. Description of C[illegible]

[illegible]

Prep[illegible] students for the study of calculus for business, natural and social sciences. Topics include detailed study of polynomial, exponential, and logarithmic functions.

2. Old catalog description

**MATH 105 College Algebra** 3c[illegible]

[illegible]

[illegible] polynomial, exponential, and logarithmic fu[illegible]ned primarily for students planning to take MA[illegible]

The proposed change is to eliminate the last sentence from the description. That is, eliminate the sentence

[illegible] the College o[illegible] been developed to replace MATH 121 as a requirement for students in that college. The new c[illegible] [illegible]ematics for Business, and it has MATH 105 as a prerequisite, ju[illegible] 121 does. If the line "Designed primarily for students planning to take MATH 121" is not [illegible] to take MATH 115 or MATH 121", we are choosing to delete the line entirely.

Part III. Letters of Support

Liberal Studies Office Dr. Mary E. Sadler

110 Gordon Hall Ext. 7-5715 email: msadler

**Date:** December 7, 2000

**To:** Dr. Gerald Buriok

**Subject:** Liberal Studies approvals

The following proposals were reviewed and approved at the November 16, 2000 Liberal Studies committee meeting:

MATH 105 College Algebra – catalog description change approved
