Need to Know- Confined Spaces- Construction

PA OSHA CONSULTATION

Remember....

- Competent persons must identify and evaluate all confined and permit-required spaces
- Unauthorized employees must not enter the permit spaces
- Before entry, test the atmosphere with calibrated direct-reading instrument for the following conditions (in this order):
 - Oxygen content
 - Flammable gases & vapors
 - Potential toxic air contaminants
- If continuous monitoring is not used, periodic monitoring is required with sufficient frequency to ensure safe operations
- Before each entry the employer must:
 - Prepare an entry permit
 -
