

Remember....

- Competent persons must identify and evaluate all confined and permitrequired spaces
- Unauthorized employees must not enter the permit spaces
- Before entry, test the atmosphere with calibrated direct-reading instrument for the following conditions (in this order):
 - o Oxygen content
 - o Flammable gases & vapors
 - o Potential toxic air contaminants
- If continuous monitoring is not used, periodic monitoring is required with sufficient frequency to ensure \(\text{9} \) - \(\text{2} \) \(\text{4} \) \(\text{3} \) (coperations

- Before each entry the employer must:
 - o Prepare an entry permit
 - 0
