Course Name and Number Changes

Part I. Curriculum Change Request Form

Part II. Description of Curriculum Change

1. Complete catalog description

CM 471 - Electronic Imaging

3c-01-3sh

Prerequisites: CM 271, permission

An introduction to the use of electronic still photography (ESP) for the capture, recording, and transfer of still images, and the use of computers for the storage, manipulation, and output of color and black and white photography. Extensive training in the use of software packages for image enhancement, restoration, and manipulation will be provided. Students will learn the applications of this technology to the print media and will examine the ethical and legal issues of image manipulation.

2. Listing of the proposed change(s) giving old and new title and number

CM 479 - Electronic Imaging

New Number and Title
