Rationale for Proposed Changes	
(A) Why is the program being revised?*	

<p>(B) Identify ALL Program Student Learning Outcomes (SLO) - even if none are changing. Indicate any SLOs that have been changed in response to the Program Revision by highlighting them in red.* You will also need to indicate how you are measuring the Programmatic SLO's</p>	<p>Students will be able to:</p>		
	#	Outcome	How outcome measured
	1	Identifying existing knowledge	Locate published research in economics and related fields; locate information on particular topics and issues in economics; search out economic data as well as information about the meaning of data and how they are derived.
	2	Demonstrating command of existing knowledge	Write an abstract for a published journal article; summarize the existing economics literature on a research topic; state succinctly the dimensions of a current economic policy issue and identify relevant policy alternatives; explain key economic concepts and describe how they can be used.
	3	Interpreting existing knowledge	Read and interpret a theoretical analysis, which includes simple mathematical derivations, reported in an economics journal article.
	4	Interpreting and manipulating economic data	Construct tables from already available data; explain how to understand and interpret numerical data found in published tables such as those in The Economic Report of the President; be able to identify patterns and trends in published data such as those contained in the Digest of Educational Statistics; read and interpret a quantitative analysis, including regression results, reported in an economics journal article.
	5	Applying existing knowledge	: Prepare a five-page written analysis of a current economic problem question; prepare a two-page critique of peer research based on existing economics literature.
	6	Asking pertinent and penetrating questions	Demonstrate an understanding of questions that stimulate productive discussion (factual, interpretative, and evaluative) and that reflect particular concerns when engaged in discussing economic issues and policies.
	7	Creating new knowledge	Identify and formulate a question or series of questions about some economic issue that will facilitate its investigation; prepare a five-page proposal for a research project; complete a research study with its results contained in a carefully edited fifteen-page paper.
<p>(C) Implications of the change on the program, other programs and the Students:*</p>	None Anticipated
