Course Analysis Questionnaire Section A.

A1. The proposed course is designed for majors. Geography students specializing in cartography require more extensive training than they are currently receiving. The creation of a second course will permit that expanded coverage. Specifically, rather than the current examination of a select few map types students will receive detailed training in how to make a larger variety of maps, continued training in map layout and design, integrating computer generated maps with cartographer embellishments to

- b. The course will be taught in L8, the departmental cartography lab, and will use the departmental darkroom in L16b.
- c. Required equipment is in position and functioning.
- d. The department has adequate resources for photographic supplies, students must purchase some expendable materials.
- e. There exist adequate library materials.
- f. None will be needed.

C2. No.

Geography 313/513: Advanced Cartography Dr Carbrick Office Land a Course Description: This course expands upon principles of thematic cartography learned in GE213. Topics covered include: selection of
