# [GEOS][150][Geology of the National Parks]-DEAdd-2015-11-30

## Form Information

The page you originally access is the global template version. To access the template document that progresses through the workflow, please complete the following steps:

First Step: ONLY change the text in the [brackets] so it looks like this: **CRIM 101 Intro to Criminology-DEAdd-2015-08-10**

**Brief Course  
Outline\***

***Give an outline of sufficient detail to communicate the course content to faculty across campus. It is not necessary to include specific readings, calendar or assignments***

***As outlined by the federal definition of a "credit hour", the following should be a consideration regarding student work - For every one hour of classroom or***

***direct faculty instruction, there should be a minimum of two hours of out of class student work.***

1. Geological processes that have created and shaped our national parks
  - a. Sedimentation (Grand Canyon, Zion, Canyonlands, Virgin Islands, Gros Morne)  
include examples of marine sequences, desert sands, reef carbonates, and ancient shorelines

**For each  
outcome in the  
course, describe**

Outcome 1: to examine the growth and development of the North American continent as preserved in the spectacular rock outcrops of its national parks.

Review the lecture and handouts on the following topics:
