II. DESCRIPTION OF THE CURRICULUM CHANGE

[REDACTED]

C. Student Research Projects (16 hours)

Students will carry out geologic research under the direction of their faculty mentor

Carson, R.J. and Sadd, J.L., Land-use-planning writing assignment for an environmental geology course: Journal of Geologic Education, v. 39, p. 206-212.

Cochran, W., 1985, Geowriting, American Geosciences Institute

Davis, L.E., Eves, R.L., Corner, H.M. and Urbanczyk, K.M., 1991, Student abstract writing

COURSE ANALYSIS QUESTIONNAIRE

Section A: Details of the Course

A1: Student research in the Geoscience Department was previously informal and squeezed into one semester, in conjunction with the oral-presentation course GS 480 Geoscience Senior Seminar. In order to give students a more structured and longer experience in conducting their own research, as well as more practice in writing up their research results, this course was designed as a "prequel" to GS 480. It will be taken in the Fall semester of the senior year by both B.S. - Geology and B.S. - Environmental

C7: No enrollment limits exist for a course of this type.

Section D. Miscellaneous

No additional information is necessary.
