II. Description of Curriculum Change

1. Catalog Description.

Designed to study the methods of describing data, probability theory, discrete and continuous random variables, sampling distributions, estimation and tests of hypothesis for means, proportions and variances, and simple linear regression and correlation.

2. Listing of proposed changes.

Old Catalog Description

Designed to introduce the study of probability theory, discrete random variables and probability distributions, empirical frequency distributions, theoretical frequency distributions

New Catalog Description

Designed to study the methods of describing data, probability theory, discrete and continuous random variables,

statistical investigations and and sampling, and sampling

which have always been a major part of this course.

The new catalog description clearly states that descriptive statistics, inferential
~~statistics, probability theory, discrete and continuous random variables, and~~

sampling distributions make up the content of this course. That content has not
changed, but the old catalog description is less clear about delineating that
content.

III. Letters of Support.

Attached.

To: Department Chairpersons
College of Business

✓ Mr. Duane Ponko, Accounting Department
Dr. Terry Ray, Finance and Legal Studies Department
Dr. John Orife, Management Department
Mr. Kenneth Schildt, MIS and Decision Sciences Department
