RE: Rehabilitation Program Revision

Attached you will find a revision of the Proposed Rehabilitation Program Revision responding to your screening comments. Thank you for catching these errors.

PROGRAM REVISION  
Rehabilitation Program

Part II Description of Curriculum

Bachelor of Science — Rehabilitation  
Liberal Studies: as outlined in Liberal Studies Section with the following specifications. 54-55

Natural Science: Laboratory

HP221	Human Structure and Function	3 sh
PC312	Adult Development and Aging	3 sh
PC378	Psychology of Death and Dying	3 sh
S0251	Sociology of Human Sexuality	3 sh
S0335	Alcohol and Drug Abuse	3 sh

Free Electives: 14-16

Total Degree Requirements: 124

(\* ) Some Controlled Elective choices have prerequisites that may be used as Free Electives.

a. Table comparing old and new programs.

Current program choices for controlled electives (24 sh)	Revised program choices for controlled electives (24 sh)
---	---

Current program choices for controlled electives (3-4 sh):	Revised program choices for controlled electives (3-4 sh):
	EX419 Education of Persons with Brain Injuries or Learning Disabilities 3 sh
	PC312 Adult Development and Aging 3 sh
	PC378 Psychology of Death and Dying 3 sh
	S0251 Sociology of Human Sexuality 3 sh
	S0335 Alcohol and Drug Abuse 3 sh

2. Please see associated course

3. Rationale for change: The proposed revision expands the list of courses from which a student may select for a "controlled

elective" this provides students with the opportunity to

select a course they feel will add to their professional development. The field of Rehabilitation is broad and this change will help us accommodate the needs of students interested in specializing in diverse aspects of the field.

Part III. Implementation:

1. The program revision will have a positive effect on students

Part V.      Letters of Support

See attached letters from Drs. James Mill, Robert Prezant, Herb Hunter and Carl Schneider. Also, letter from Clarice Reber.

Subj: RE: Rehab. program electives

Clarice,  
I remember discussing this situation with you last semester and as a result of our discussion, spoke to Ed Sloniger about the proposed change involving HP221.

as well as the problems some of the Rehab majors are having with the course

As far as I am concerned feel free to make whatever changes needed in your curriculum to ensure the best education for the rehabilitation majors. The department of HPE will support your decision.

Subj: Rehabilitation Program Electives

Clarice,

I have received the E-mail from Laura Marshak regarding use of BI150 (Human Anatomy) and BI151 (Human Physiology) as controlled electives

for the expanded rehabilitation program. With respect to

taking effect in Nursing we have seen a few slots open in those courses. Thus, unless there are additional changes across campus (and Nursing is about to put forward some new programs that could impact BI151) we could be able to handle the few students indicated by your program.

Subj: Rehabilitation Program Electives

You have my permission to list the two courses you mentioned as controlled electives in the Rehab program. I would like to know more about your program, since this is the first time I have ever heard of the Rehabilitation program. The two courses you mentioned are offered regularly, but I cannot guarantee that this will always be the case; since schedules are determined by programmatic needs. One of our new faculty

Disabilities, which is likely to become an established course, so you may  
have some interest in this course. You can make inquiries with Deolyn
