[The following text is extremely faint and largely illegible due to heavy noise and low contrast. It appears to be a multi-page document with several sections.]

[Section 1]
 The first section of the document discusses the initial findings and the scope of the study. It mentions the importance of understanding the current state of affairs and the need for a comprehensive review.

[Section 2]
 The second section details the methodology used in the research. It describes the data collection process, the selection of participants, and the analytical techniques employed to interpret the results.

[Section 3]
 The third section presents the results of the study. It includes several tables and figures that illustrate the key findings. The data shows a clear trend in the areas being examined, which has significant implications for the field.

[Section 4]
 The fourth section discusses the implications of the findings. It explores how the results can be applied in practice and what they mean for the future of the industry or organization.

[Section 5]
 The final section provides a conclusion and offers recommendations for further research. It emphasizes the need for continued monitoring and evaluation to ensure that the findings are effectively implemented.

George Dean

Center of Liberal Studies

PART II.

An overview of the history of respiratory care and nursing. Topics include medical records, infection control, sterilization and psychosocial aspects of illness.

Prerequisites: None

2. Old title/number:
RT 335 Nursing Arts

New title/number:
RT 335 Patient Care Skills

This course was not appropriately named when it was developed. It

was never intended to be a nursing course but rather an introduction to basic skills needed in order to provide basic patient care.
