Tips for Creating a Successful Rubric

Rubric Workshop Teaching Excellence Center Indiana University of Pennsylvania March 31, 2001

[See "Sample Restaurant Rubric" in packet]

Performance dimensions (e.g. Food, Service, etc.)

- š 3 to 5 key features
- š One dimension per key attribute being assessed

<u>Performance criteria</u> (e.g. Food - Flavor, Appearance, Healthfulness)

- š Measure(s) of performance dimension, "teachable" attributes
- š Optional for simple rubrics
- š 2 to 3 measures

<u>Performance quality levels</u> (e.g. Excellent, Above Average, etc.)

- š What "Excellent", "Above Average", etc. mean
- š Specific definitions for each level
- š Concise description(s)
- š Positive language

Scoring strategies (e.g. Excellent - 4 pts., Above Average - 3 pts., etc.)

- š Holistic (one score for all criteria)
- š Analytic (one score for each criterion)
- š Weighted criteria optional
 - Equal weighting (each criterion same relative value)
 - Different weighting (certain criteria more important)
- Š Unscored criteria (performance quality rated, but no points assigned to dimensions)

General

- š Start simple
- š 1 to 2 pages
- š Seek input (peers, students, self)
- š Share with students at outset
- š Work in progress
